123 . / .com Done

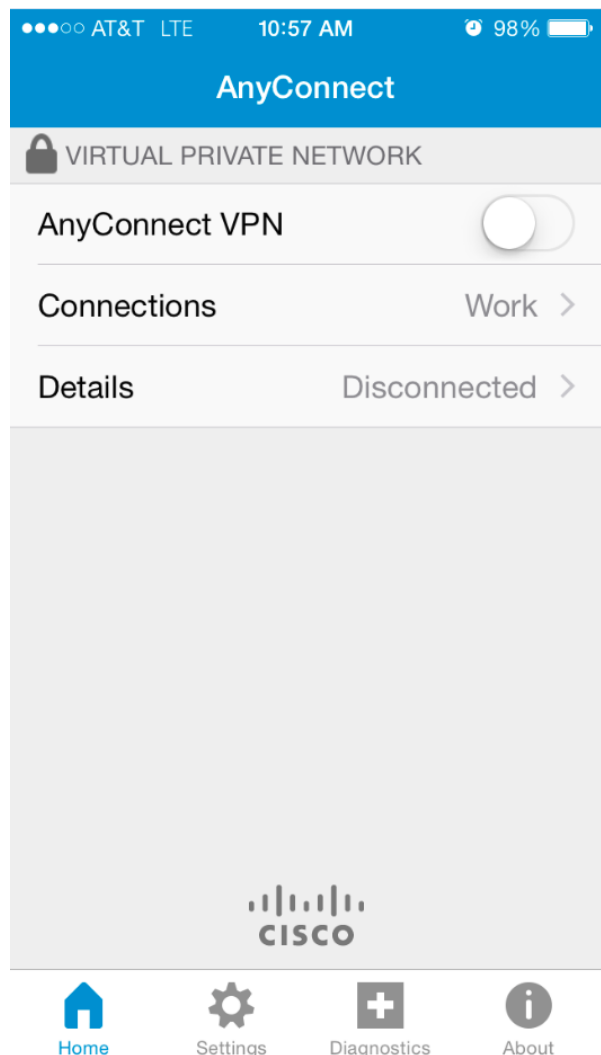

Add a Description and type **vpn.slocounty.ca.gov** into the **Server Address field**, then **press Advanced**.

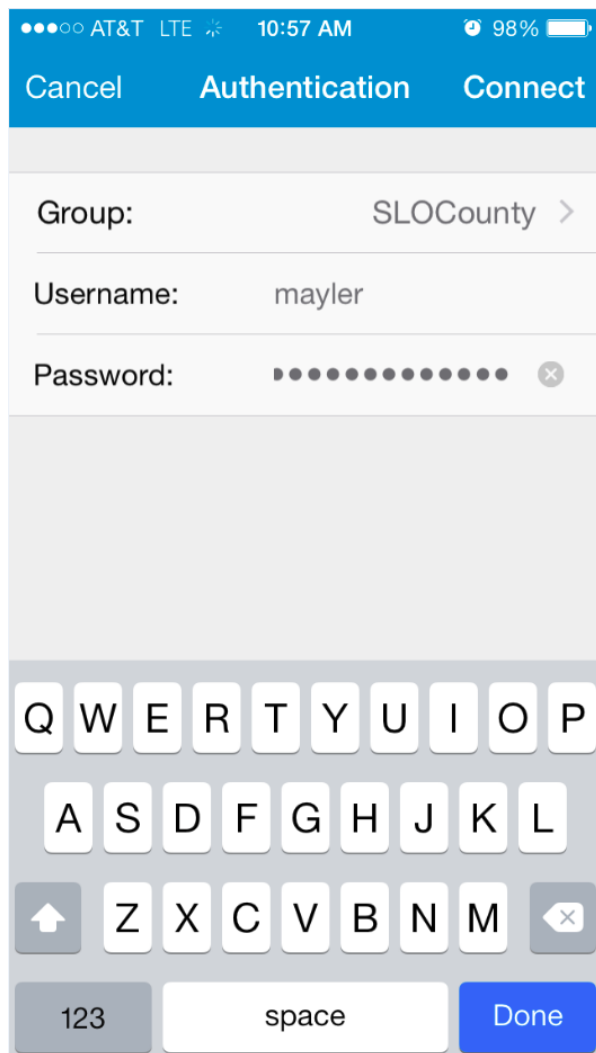

The left screen above shows the default Advanced VPN Settings. **Press Certificate** and **select Disabled**, then **Press Connect with IPsec**. Your screen should look like the screen on the **right**. Now **press Back**.

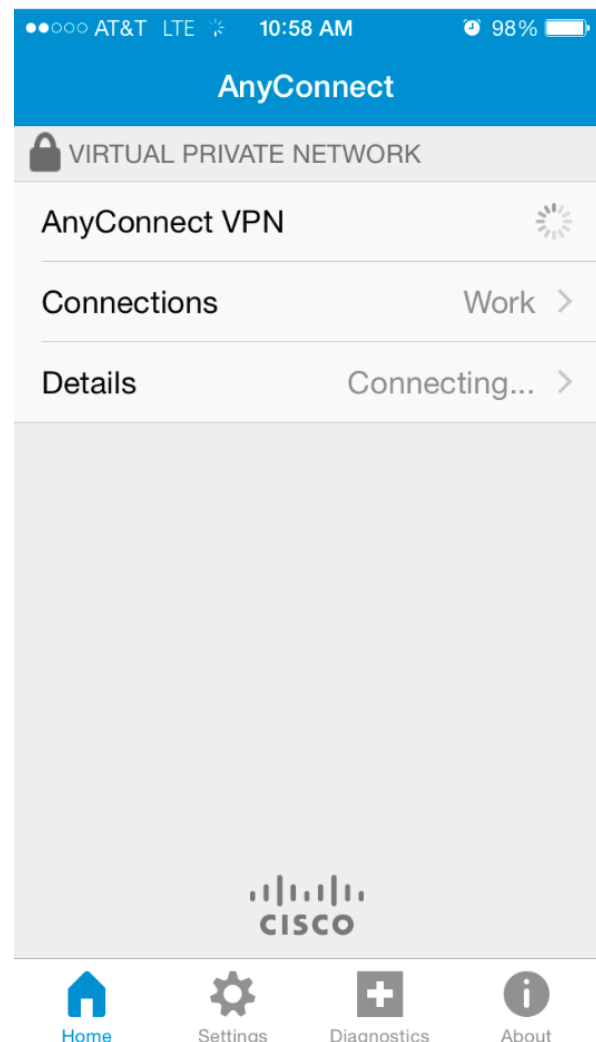

Press Save.

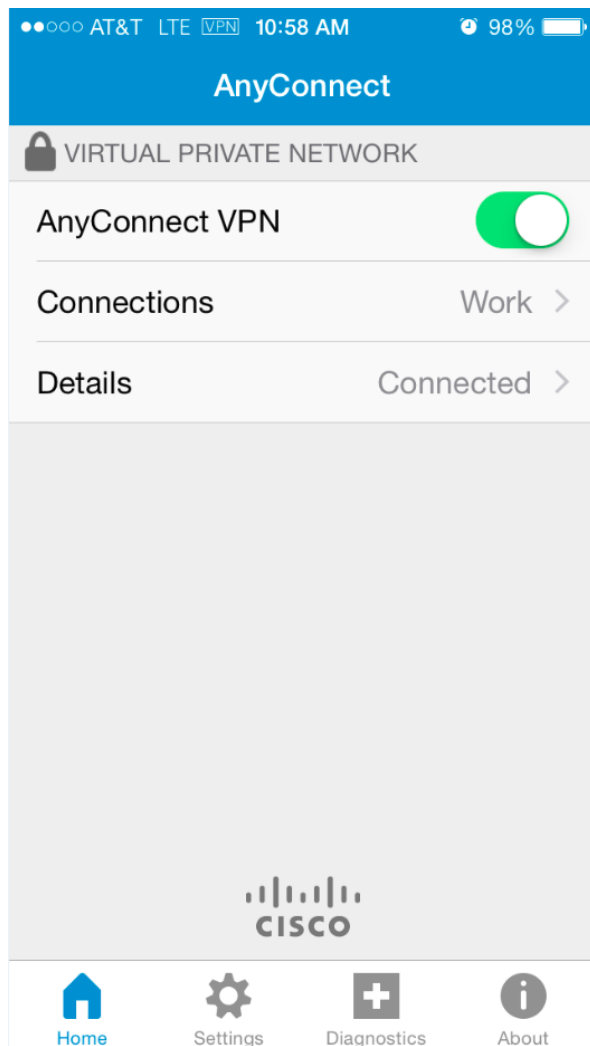

Press the AnyConnect VPN slider to connect.

Insert **your Username and Password**, Press **Done**

You should see this screen.

If you've followed all instructions and typed the correct username and password, you'll see this screen. You are now connected to the County Network. Now you can access resources as you do from the office.

Press the AnyConnect VPN slider again to disconnect.
